ATH
Hardware provides extra flexibility in positioning an arm. It allows side to side and/or up and down positioning so clinicians can mirror the arm's position. Also, edematous hands and fingers can be elevated.

It works with the GAT Arm Trough and any of the Gel Ovations track systems including Modular Track and LaBac compatible systems - including the Track Mount Series (TMS), GEL Track Series (GT), the Waterfall Track Series (GWT) and others.

Then… ADD the Comfort of GEL

3 sizes of GEL Liners for Polyurethane Troughs:

OTLS 13" pair
OTLS 19" pair

Want true GEL Arm trough?

GAT GEL Arm Trough

This GEL arm trough has a high back that serves as an elbow stop. The ATH multi-axis attaching hardware and a GEL hand pad work with the GAT.

New for 2020 is the Dimensional GEL Arm Trough (DGAT). The extra comfort and protection of Dimensional GEL is available for a small additional charge.

And, we're not done YET. Next GEL option is the easily configurable modular system. If you can think it, you can build it:
